

MUHAMMED NAFIH

Data Analyst

Bengaluru, Karnataka | [+91 96050 58877](tel:+919605058877) | nafihhmohd@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

Data Analyst with 2+ years of MIS and BI experience across a ₹50L+/month retail operation and a strong quantitative foundation from a Physics postgraduate degree. Skilled in SQL, Python, Power BI, Tableau, and Advanced Excel, with projects spanning churn prediction, CLV modelling, ETL pipelines, and predictive analytics — including a live deployed Streamlit application. Google-certified with a track record of building analytics solutions that support data-driven business decisions.

TECHNICAL SKILLS

Languages & Querying: SQL (MySQL, PostgreSQL, Joins, CTEs, Window Functions), Python, DAX

BI & Visualisation: Power BI, Tableau, Advanced Excel

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Lifetimes

Analytics Methods: EDA, RFM, Cohort Analysis, CLV Modelling (BG/NBD, Gamma-Gamma)

Modelling: Random Forest, Regression, Predictive Modelling, Churn Analysis, A/B Testing

MIS & Reporting: KPI Development, Stakeholder Reporting, Dashboard Design, Variance Analysis

Data Engineering: ETL Pipelines, Data Wrangling, Data Cleaning, Power Query

Tools & Platforms: Git/GitHub, Streamlit, Jupyter, VS Code, Google Colab, ERP Systems, HTML, CSS, JavaScript

PROJECTS

Retention Strategy Simulator — Churn & CLV Analytics

Python · Power BI · Streamlit · Scikit-learn · Lifetimes | Dataset: Online Retail II (UCI, 1.06M+ transactions)

- Identified ~₹1.6Cr (\$196K) in recoverable revenue and a 54% ROI retention strategy (vs 16% for discount-led approaches) — built on CLV + churn modelling (BG/NBD, Gamma-Gamma) across 1.06M transactions from 4,967 customers, with a 120-day churn threshold.
- Deployed a **live production Streamlit app** enabling real-time churn probability prediction, CLV forecasting, and ROI simulation for any customer RFM profile. Live: retention-strategy-simulator.streamlit.app
- GitHub:** github.com/nafihhmohd/retention-strategy-simulator-churn-clv-bi

Omni-Channel Retail Momentum — Prescriptive Marketing Analytics

SQL · Python · Power BI | Revenue driver identification and budget optimisation

- Projected 12.22% revenue uplift from a 20% ad-spend reallocation** — validated via Random Forest feature importance scoring on an SQL-based ETL pipeline, enabling data-backed budget allocation decisions.
- Engineered KPI-ready fact tables through full ETL pipeline from raw data to Power BI scenario dashboard, covering marketing channel performance and demand forecasting.
- GitHub:** github.com/nafihhmohd/omnichannel-retail-momentum

Retail Inventory, Demand & Promotion Analytics — BI Architecture

SQL · Python · Power BI | Operational intelligence across 400 inventory records

- Designed **SQL-first BI architecture** across 400 inventory records; engineered 7 operational KPIs including inventory turnover, demand-supply gap, and variance analysis.

- Built 3-page Power BI dashboard (Operations Overview, Inventory Risk, Promotion Effectiveness) validated through Python EDA — providing actionable stockout and overstock alerts.
- **GitHub:** github.com/nafihhmohd/retail-operations-bi

Performance Analytics & Risk Scoring Dashboard

Python · Power BI | 1.3M+ records, 34 entities

- **Processed 1.3M+ records;** built 5-page Power BI dashboard with DAX-based role-wise ranking, drill-downs, and player snapshots — delivering an interpretable rule-based shortlisting framework for 34 entities.
- **GitHub:** github.com/nafihhmohd/odi-wc-2027-squad-analytics

WORK EXPERIENCE

MIS & Operations Analyst

Oct 2022 – Sep 2023

Offerkart · Bengaluru

- **Drove ~20% store sales improvement** through category-level trend analysis, A/B testing of promotions, and report automation — across a ₹50L+/month retail operation with 3,000–5,000 SKUs.
- Designed and delivered daily/weekly MIS reports covering 10 KPIs (sales, expenses, attendance, inventory) — consolidating data from ERP systems for executive stakeholder reporting.
- Maintained CRM database for 1,500–2,000 customers; conducted escalation pattern analysis to surface retention risks; reduced reconciliation errors through meticulous vendor master data and invoice verification.

Marketing Team Lead

Mar 2022 – Aug 2022

AJ Gold and Diamonds · Kannur

- **Increased walk-in conversions by ~10–15%** through location-based campaigns; led an 8-member team tracking 150–200 daily outreach interactions with structured performance monitoring.

EDUCATION

Master of Science — Physics

Sep 2023 – Jun 2025

Dr. Harisingh Gour University, Sagar, M.P.

- Built advanced foundations in statistical analysis, statistical modelling, and quantitative problem-solving — applied structured data analysis pipelines to experimental research datasets (TGA, DSC, UV-Vis, FTIR), directly analogous to real-world data analyst workflows.

Bachelor of Science — Physics with Computer Science

Jun 2018 – Apr 2021

Wadiah Institute of Research and Advanced Studies, Kannur, Kerala

- Completed foundational coursework in SQL & DBMS, Python, C Programming, and Visual Basic — establishing database management, programming logic, and structured data handling skills.
